About Me

Results-driven professional with a strong foundation in Software Engineering and Business Analytics. Passionate about continuous learning and contributing to organizational growth, I bring hands-on experience in software development, client communication, and business development strategies. I excel at translating business requirements into effective technical solutions. My technical expertise includes building scalable softwares, analyzing business requirements, database management and programming. I aim to contribute my analytical, problem-solving, and communication skills to deliver impactful results in a dynamic work environment.

Technical Skills

Business Analytics & Management: Client Management, Business Development, Requirements Gathering, Agile/Scrum (Jira).

IT Support: System Troubleshooting, Hardware Basics, Windows/Linux Environments.

Programming Languages: Python, JavaScript, PHP, Java, HTML & CSS.

Frameworks & Architecture: Node.js, React, Nest.js, Angular, Capacitor, MVC Architecture , RESTful API Design.

Databases: Mysql, MongoDB.

Education

Brac University | Bachelor's Degree

Passing Year -2025

- Major: CSE
- CGPA: 3.62/4.0

Rajshahi Govt. City College | HSC

Passing Year -2020

- Group : Science
- GPA: 5.0/5.0

Work experience

SoftLab It | Junior Software Engineer

October 2025 - April 2026

- Develop and optimize E-Commerce software solutions, applying strong analytical and problem-solving skills to improve system architecture.
- Manage client relations directly, acting as a liaison to bridge technical implementations with business objectives and ensuring clear communication.
- Provide foundational technical support and infrastructure guidance, drawing on practical knowledge of design architecture and systems administration.

Youth School for Social Entrepreneurs (YSSE) | Intern

December 2023 - May 2024

- Executed strategies within a virtual internship program focused on organizational growth and business development.
- Collaborated effectively within a dynamic team environment, demonstrating strong teamwork, communication, and adaptability.

Projects

Clothigo- A Clothing Website for Online and POS system | Angular, Nest.js, MongoDB

- Developed a scalable multi-branch inventory system with real-time stock tracking and role-based access control.
- Built optimized data-driven interfaces using server-side pagination, filtering, and sorting for large datasets.
- Implemented robust API integration and maintainable Angular architecture with environment-based configuration and clean code structure.

TrustPoint Pharma | Angular, Nest.js, MongoDB

- Built a full-stack pharma/e-commerce platform using Angular, NestJS, and MongoDB with modular architecture (catalog, orders, inventory, payments, reporting).
- Integrated secure online payments, real-time notifications (WebSockets), and automated report generation (PDF/Excel).
- Implemented production-grade features including JWT-based multi-role authentication, rate limiting, email/push notifications, and background job processing.

Boi-poribar- A online book selling platform | Angular, Nest.js, MongoDB, Capacitor App

- Built a cross-platform eCommerce and digital reading app using Angular 18 and Capacitor with an SSR-capable architecture.
- Developed dynamic catalog, cart, checkout, and order tracking features with lazy-loaded modules for improved performance.
- Integrated EPUB/PDF reading, analytics tracking, and native Android UX enhancements for better user experience and app stability.
